ACESO™

Our Goddess Of Nail Recovery

A Salon Solution designed to provide support to the symptoms of some common nail conditions by penetrating through the nail plate onto the nail bed and the surrounding soft tissue.

ACESO may address symptoms associated with common nail conditions.

The products use natural bio-actives to support the results.

While IBX works IN the nail, ACESO works IN the nail bed.

I am so impressed with the results of ACESO!!! I never thought my nail would ever look normal again much less if I would ever be able to wear gel or gel polish again and I now have my nail back to looking amazing and healthy!

IBX[®] SYSTEM

The IBX[®] SYSTEM is a revolutionary two-part system that toughens the natural nail from WITHIN so that it can grow on it's own. It also acts as a "protective shield" INSIDE the natural nail under all gel polishes.

The IBX[®] SYSTEM works by fusing the nail's top layers together by creating an inter-penetrating polymer network that becomes a permanent addition to the nail.

The IBX[®] SYSTEM is a service based product to use alone or in conjunction with another nail service on your clients and provides you with incremental revenue as an add-on service.

Famous Names has a complete educational program (on-line and in person) so you may master it's use and maximize results.

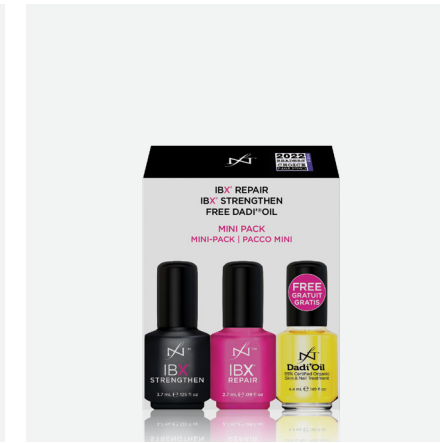

IBX[®] really is a game changer to keep your nails healthy and strong. It is nice to have a system that truly works and helps to fix your nail needs.

After 1 IBX[®] Treatment

I love using IBX[®]! I offer it to my clients as a way to "rehab" nail damage and reinforce weak nails. It's also great for doing repairs on a torn nail. My clients love that it's their nail being fixed from the inside, and not just put a layer of acrylic on top like most salons do.

IBX[®] SYSTEM

Longer and more beautiful natural nails!
A nail revolution that **perfects** what nature always intended.

WHAT MAKES IBX[®] DIFFERENT AND UNIQUE?
The IBX[®] SYSTEM is the first treatment of its kind — a toughener that works **INSIDE** the nail plate, instead of an enhancement that just sits on top.

IBX[®] penetrates into the upper layers of the nail plate, but then cross-links to itself and not to the keratin in the nail plate. Unlike other formaldehyde-based products, IBX[®] makes nails flexible instead of brittle.

Upon curing, IBX[®] locks in to form an IPN (Interpenetrating Polymer Network) within the upper layers of the nail plate.

That IPN, a permanent addition to the nail plate, is the foundation of the IBX[®] magic that encourages natural nail growth and protects nails underneath Gel Polish.

BENEFITS

OF THE IBX[®] SYSTEM

We're Done Hiding

Problem Nails — so we've found a way to really **HELP** them. The UV/LED curable technology in The IBX[®] SYSTEM penetrates into the upper layers of the nail plate to toughen and protect weak nails, as well as fix chronic imperfections.

Here's what to expect...

UNDER GEL POLISH/ALL NAIL ENHANCEMENTS

- Creates a protective shield for the natural nail, safeguarding it against the Gel Polish removal process (IBX[®] STRENGTHEN)
- Reduction of surface-based “white spots” (IBX[®] REPAIR)

AS A NAIL GROWTH TREATMENT

- Repair of severe or chronic nail damage that would typically prevent nail growth (IBX[®] REPAIR)
- Internally toughens the nail plate to allow for growth (IBX[®] STRENGTHEN)
- Fills in grooves to smooth the nail plate
- Improves natural nail color and appearance

TO THE NAIL PROFESSIONAL

- Increased revenue from what has become the ultimate add-on service. **Healthy nails, happy customers!**
